Acknowledgement of Reviewers 2022

On behalf of the AJGP editorial board, I would like to thank the many colleagues who have served as triage editors and as reviewers over the past year. In close collaboration with the editorial board, I have sought to diversify the scientific and clinical disciplines represented among triage editors and reviewers, to capture the transdisciplinary nature of geriatric mental health, in science, practice, education, and policy; and to enhance the value of peer review for the Journal’s authors and readers. In addition, the richness of scientific, clinical, and policy perspectives thereby attained has informed the many paired editorials published over the past year. I hope that you, our readers, are finding these developments to be useful and engaging. Thank you, also, for your feedback and support of the AJGP.

Charles F. Reynolds III, M.D.
